

ChoiceScripts™ and WLT Software Partner to Further Streamline Pharmacy Benefits Integration

FOR IMMEDIATE RELEASE

Royal Oak, MI— June 13, 2024

ChoiceScripts Rx and WLT Software announced a new partnership that will broaden access to leading pharmacy benefit management solutions for WLT Software clients and simplify data and workflows for ChoiceScripts clients through the seamless exchange of accumulator data.

“ChoiceScripts is thrilled to partner with WLT Software to streamline our solutions and make them more accessible for our partners and clients,” said Joseph Yaklic, President, Co-founder, & COO at ChoiceScripts. “This collaboration will create a better experience for everyone involved as we move towards a future where the integration of technology continues to remove the barriers of inefficiencies and disconnection in healthcare.”

This partnership is a win for payors since they will have the ability to make more informed decisions based on actionable, timely insights through the automatic exchange of data. Health plans looking to integrate ChoiceScripts as their pharmacy benefit manager and consultant can also receive a no-cost savings analysis to compare pharmacy savings to their current arrangement and others on the market. This removes another barrier to pharmacy integration, making the process more manageable from every angle.

About ChoiceScripts Rx

ChoiceScripts is an innovative pharmacy benefits architect, combining the best of benefits consultation and management. Headquartered in Royal Oak, MI, ChoiceScripts offers personalized, custom-built benefit solutions, making them more than just a PBM.
